Topic-based Conversations and Collaboration

ndThread's award-winning collaboration technology brings together key activities conversations, documents, and more—into a unified, topic-based solution.

Discover how ndThread's technology drives productivity and enhances the workflow of teams.

**Project/Matter-Based Conversations** — Discuss ideas, share links, and exchange documents with real-time messaging tied to the projects you are working. No more endless email chains and insecure attachments.

**Document Annotations** — Access any file in NetDocuments and bring it to life with both global and contextual annotations. Highlight a portion of the document you are interested in and start a discussion with your team.

Automated Governance — Secure all your content, including conversations, effortlessly using the same encryption and governance rules applied throughout the NetDocuments Service. NetDocuments protects each discussion with multiple key encryptions, geo-aware storage, and much more.

### ndThread simplifies your communication.

Improved communication and collaboration through social technologies could raise the productivity of interaction workers by 20 to 25%.

#### What if you could...

- Significantly reduce email volume.
- Close on security gaps and protect conversations like documents and email.
- Comment and collaborate directly within the document.
- Securely track and store discussions within a topic.

40% of time spent on administrative tasks

- Reading and answering email
- Searching and gathering information
- Communication and collaboration internally
- Role-specific tasks

## **Capture Insights Around Documents**

- Find any document in NetDocuments with full-text search.
- View and share documents with colleagues, without worrying about who has the most recent or "checked out" version.
- Highlight and create annotations inside the document, building version-specific knowledge around every file.

# ndThread Makes It Easy to:

#### **Discuss Every Project in One Place**

- Engage with colleagues working on the project to get immediate updates and share critical information.
- Pass documents to colleagues that are securely stored and accurately profiled in NetDocuments.
- Monitor the progress of projects without an endless chain of "cc" emails.
- Quickly search for information and knowledge or help new team members catch up on a project.
