FLEXSTORE PRIVATE STORAGE

No two organizations are alike and, most likely, neither are their document management needs. As technology and regulations evolve and change, so does the need for solutions that can meet your requirements. FlexStore from NetDocuments delivers increased flexibility in storage options, simple design, and the dependability and security required for today's environment.

Greater Flexibility, Less Hassle

Teams rest easier knowing their security, compliance, and data sovereignty requirements are being met with FlexStore as it offers easy-to-configure on-premises and cloud-based storage options that work seamlessly with NetDocuments to meet your specific information governance needs. FlexStore works with Microsoft Azure regions, or on-premises in your data center on Nutanix Object Store technology, with expertise in design, setup and support from Sanity Solutions our premier Nutanix partner.

Built to Fit

FlexStore is not a one size fits all option. It is a highly configurable tool built to maximize your resources and time. FlexStore helps combine the best of several storage options with:

- Simplicity in design and ease of use
- Scalability that fits your organization today and grows with your business
- Proven architecture woven into NetDocuments
- Continued solution testing and proof of performance
- Short start-up time from solution launch
- Support from industry leading service and solution providers
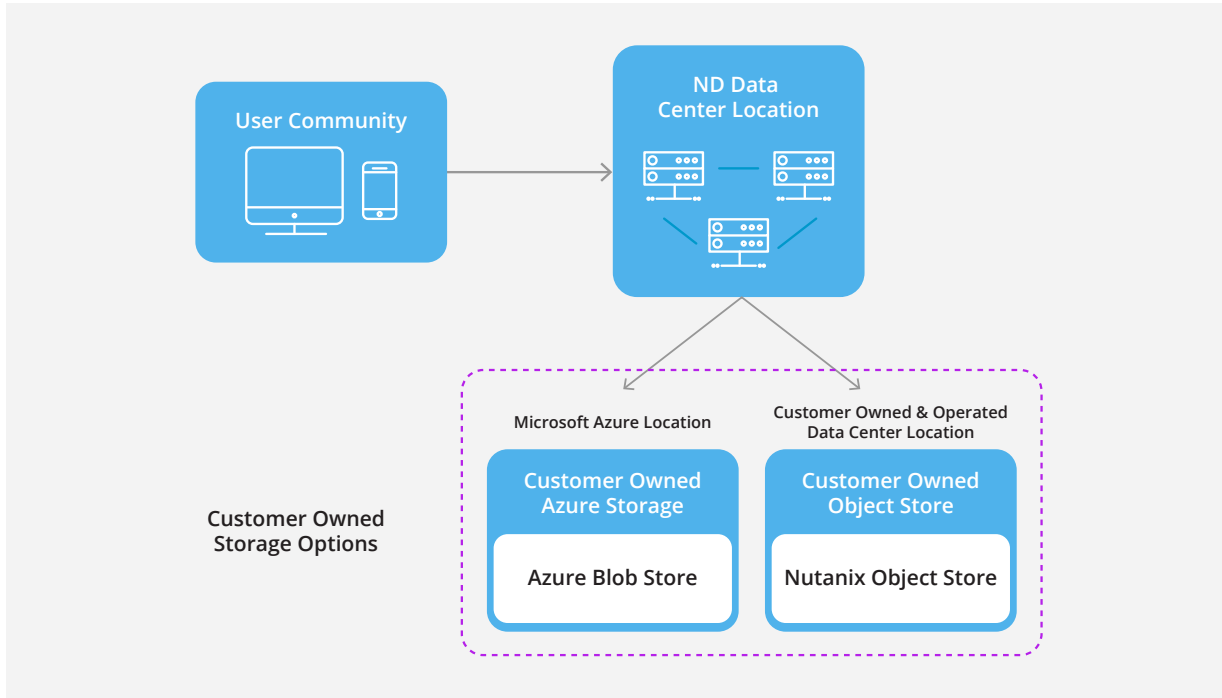

FlexStore Storage Options

There are two options for customer managed storage for use with FlexStore:

1. Microsoft Azure cloud storage
2. Private Storage

NetDocuments supports one solution for customers private storage in their own data centers: Nutanix Object Storage technology. NetDocuments updates and tests against the Nutanix interfaces to certify our interoperability.

FlexStore Private Storage Options

The diagram below shows how a NetDocuments user connects through the NetDocuments Service Region to either of the customer owned storage options:

Whenever national, regional, or industry specific regulations mean customers need to look for local private storage solutions to use with their cloud based services to meet data sovereignty of other requirements, Sanity Solutions and Nutanix are NetDocuments go-to partners to provide a flexible information governance compliant response to customers' needs.
